Waterstorm Announced

Austrian based independent game developer Rarebyte announces Waterstorm, a fast paced 2D submarine multiplayer action shooter. Featuring amazing underwater scenarios, intuitive controls and high-tech weapons, Waterstorm invites gamers to participate in subaqueous battles.

Players from all over the world can join different game modes such as Deathmatch, Team Deathmatch, Capture the Flag and the newly introduced Drone Match. Gamers choose from a variety of mini-submarines, use their tactical as well as team skills and compete for the top ranks in a sophisticated ranking system. Additionally, the game has built-in support for clans by providing clan statistics, organizational tools and even more.

Rarebyte spreads the word that they are close to finishing internal testing and already preparing for the public open beta test. Waterstorm will be available for Windows, Linux and MacOS.
